DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1 - 19 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Eckblad et al..

Eckblad et al., U.S. Patent NO. 6407922 discloses a semiconductor device including a heat spreader. As explained in column 2, beginning on line 14, the heat spreader heat spreader contains carbon nanotubes. Figure 1 shows semiconductor die 3 and heat-sinking support structure 5 containing nanotubes.

Allowable Subject Matter

Claims 2 – 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

In regard to claims 2 – 9, the prior art does not teach or suggest the recited contact pads defined by at least some of the nanotube regions.

Art Unit: 2822

In regard to claims 10, the prior art does not teach the recited microchannels in which at least some nanotubes are located.
